# Mongo DB manual

"Admin" is the first button: when the user clicks the admen's button, it will take the user for the next page (Admin).

The second button is "customer": when the user clicks the customer's button, it will take the user for the next page (customer).

When the admin gets into this page he must inter his id number, if the id is in the Database, the next page will appear for the admins use. Otherwise, an error message will appear.
